NAME: GEORGE EDIR TABAN

ASSIGNMENT: STARTUP BUSINESS

FreshBox

Affordable meals, delivered to students.

Slide 1 — Title

FreshBox

Affordable meals delivered quickly to students on campus.

Making good food easier, faster, and more affordable for students.

Slide 2 — The Problem

Students often struggle to get convenient, affordable meals during busy school days.

- Food around campuses can be expensive.
- Students have limited time between classes.
- Long queues waste valuable study and break time.
- Some students skip meals or choose unhealthy options because they are cheaper and easier.

The result: Students need food that is affordable, convenient, and reliable.

Slide 3 — Our Solution

FreshBox is a student-focused food delivery platform.

Students can use FreshBox to:

- Browse affordable meals from nearby restaurants and food vendors.
- Order through their phone.
- Choose a convenient delivery location on or near campus.
- Track their order.

- Pay securely.

FreshBox brings affordable local food closer to students without requiring them to leave campus or wait in long queues.

Slide 4 — Target Customer

Our primary customers are students aged 18–25.

They are:

- University and college students.
- Busy students with packed schedules.
- Budget-conscious customers.
- Comfortable ordering through mobile technology.
- Frequent consumers of affordable meals and snacks.

Initial market

We would launch at one university campus, build a strong customer base, and then expand to other campuses and colleges.

Slide 5 — Market Opportunity

There are large numbers of students who regularly need affordable meals.

If we begin with **10,000 students** on a campus and eventually reach just **20% of them**, that gives us:

2,000 potential regular customers.

If the average customer places **4 orders per month** at an average order value of **$4**, the monthly transaction value could reach:

2,000 × 4 × $4 = $32,000

FreshBox would earn revenue by taking a small commission from each order and potentially charging a delivery fee.

Slide 6 — Business Model

How FreshBox makes money

1. Restaurant commission

- FreshBox takes a percentage of every order placed through the platform.

2. Delivery fees

- Customers pay a small delivery fee depending on distance.

3. Premium partnerships

- Restaurants can pay for increased visibility and promotional placement.

Example

A student places a **$5 order**.

- The restaurant receives the majority of the order value.
- FreshBox earns a commission.
- A small delivery fee can cover delivery operations.

As order volume grows, the business becomes more profitable.

Slide 7 — Competition

Students already have several ways to get food:

Option	Affordable	Convenient	Student-focused
Traditional restaurants	✓	✗	✗
General food-delivery apps	△	✓	✗
Campus cafeterias	✓	✓	✓
FreshBox	✓	✓	✓

Our advantage

FreshBox is designed specifically around student needs:

- Affordable meal options.
- Campus-focused delivery.
- Student-friendly promotions.
- Simple ordering.

- Partnerships with nearby local food vendors.

Slide 8 — Go-To-Market Strategy

We will start small and grow through the campus community.

Phase 1 — Launch

Partner with **5–10 local restaurants and food vendors**.

Phase 2 — Student ambassadors

Recruit students to promote FreshBox among classmates and student organizations.

Phase 3 — Introductory offers

Offer discounts such as:

“First order: 20% off.”

Phase 4 — Referral program

Students receive a discount when they successfully refer friends.

Phase 5 — Expand

Once we have strong repeat usage on one campus, expand to additional campuses.

Slide 9 — Product

The FreshBox experience

1. Discover
Students open FreshBox and see nearby affordable meals.

2. Choose
They select a meal and delivery location.

3. Order
They confirm their order and payment.

4. Track
They receive updates while their food is being prepared and delivered.

5. Enjoy
The meal arrives at a convenient campus location.

MVP

The first version can be simple: a mobile-friendly website or app with restaurant listings, menus, ordering, payments, and basic delivery tracking.

Slide 10 — Traction & Milestones

FreshBox would begin with a focused pilot rather than trying to launch everywhere at once.

First 3 months

- Partner with 10 food vendors.
- Acquire 500 registered students.
- Complete 1,000 orders.
- Collect customer feedback.
- Identify the most popular meals and delivery locations.

6 months

- Reach 2,500 registered students.
- Complete 5,000+ orders.
- Expand restaurant partnerships.
- Improve delivery times.

12 months

- Expand to 2–3 campuses.
- Reach 10,000+ registered students.
- Establish FreshBox as a recognizable student food brand.

Slide 11 — Team

Founding Team

Founder = GEORGE EDIR TABAN CEO EDIRSON

- Leads the business, partnerships, and overall strategy.

Technology Lead

- Builds and manages the FreshBox platform.

Operations Lead

- Coordinates restaurants, deliveries, and customer service.

Marketing Lead

- Manages student ambassadors, social media, promotions, and customer acquisition.

Why this team?

FreshBox requires a combination of technology, operations, marketing, and strong relationships with local food vendors.

Slide 12 — The Ask

What we need

We are seeking **$25,000 in initial funding** to launch and test FreshBox on our first campus.

Use of funds

- **40%** — Technology and platform development
- **25%** — Marketing and student acquisition
- **20%** — Operations and delivery setup
- **10%** — Restaurant/vendor partnerships
- **5%** — Administration and contingency

Our goal

Build the easiest and most affordable way for students to get meals on campus.

FreshBox: Good food. Fair prices. Delivered to students.

Let's make campus meals easier.
